

KNOWN EFFECTS OF ELECTROMAGNETIC RADIATION INCLUDING 5G IoT:

Livestock

- ✓ Reduced milk production/weight gain
- ✓ Altered pregnancy patterns
- ✓ Chronic disease, cancer
- ✓ Anxiety & stress
- ✓ Reduced ruminating and lying times
- ✓ Avoidance behavior

Plants and Trees

- ✓ Reduced germination, growth, seed production
- ✓ Reduced Chlorophyll/ photosynthesis
- ✓ Disease prone
- ✓ Require more water
- ✓ Climate fatigue

Soil

- ✓ Reduced worm count, calcium, good bacteria
- ✓ Change in mineral balance

Bees/Pollinators adversely affected

- ✓ Bee Colony Collapse

5G AG TECH: IS IT WORTH THE RISK?

No safety testing has been done by industry; independent science shows harm to soil, water, plants, animals and people.

CALL 202-225-3121

Call your DC legislator to say "NO"

URGENT CALL TO ACTION!

DO YOU WANT GOVERNMENT CONTROL OF YOUR FARM, ENERGY, WATER AND ANIMALS?

**SAY NO TO HR 1339, HR 4351 AND HR 5062;
HR 6142/S. HR 2542 AND HR 1697/S.734**

- The number of cell towers will have to increase from 1 to 7 million by 2027 to include 5G IoT; **each tower is a fire risk!** They have caused billions of dollars of loss in USA fires already. Do you have an evacuation plan?
- 5G has no cybersecurity, making your farm and assets easily vulnerable to be hacked by bad actors and can be subject to farm system sabotage.
- Will companies stay in business if your equipment needs maintenance/replacement? **Proterra** electric government subsidized buses didn't, leaving unusable, \$4M dollar vehicles parked.
- Active transmitter RFID's are not = to passive; they are placed too close to eyes, ears, and glands. Have you seen any safety tests?

“ If you are farming and are considering IoT sensors for weather monitoring, moisture monitoring and nutritional analysis, you may want to rethink your approach. Even the RFID tags for tracking livestock are mini-cells sending wireless transmissions. The "low-level" intermittent transmissions expose livestock to EMF radiation which can lead to blindness, neurological issues, rumination issues and fertility and conception rate declines, among other issues.”
 (Dan Stachofsky and Will Winter, DVM. Essential Energy Solutions, <https://essentialenergy.solutions>).
