**Re: HR1 § 43101 FCC Spectrum Auction Authority; Requesting Amendment for FCC Compliance with Court Remand Order to Review Limits for Public Safety**

Dear Chair Cruz, Ranking Member Cantwell, and members of the Committee,

We respectfully submit these amendments to require that, prior to providing the FCC's spectrum auction authority, the FCC first comply with the D.C. Circuit court remand order to review the science and other information submitted into its dockets showing biological effects within the FCC limits. The court mandate was issued more than three and a half years ago in 2021 by the US Court of Appeals DC Circuit, which the FCC continues to ignore.

We ask that you take the following actions to protect public safety:

**First choice: Delete § 43101<sup>1</sup>**

We urge the Committee to oppose § 43101 spectrum legislation until the FCC and appropriate regulatory agencies have determined the safe levels of these emissions for the public.

---

<sup>1</sup> HR 1 <https://www.congress.gov/bill/119th-congress/house-bill/1?q=%7B%22search%22%3A%22hr1%22%7D&s=1&r=1>

## **Second choice: Amend HR 1**

If the Committee proceeds with § 43101 spectrum legislation, we urge incorporating one of the specific text amendments proposed below, making auction authority contingent upon the FCC complying with the 2021 court remand order.

**Amendment Option A)** Direct the FCC to update its 1996 radiofrequency exposure limits prior to auctioning additional spectrum. Text to be inserted in HR 1 § 43101 (and any other spectrum bill).

**(a) The Commission shall**

- (1) within 180 days of the date of enactment of this Act begin a rulemaking to update its radiofrequency exposure limits contained in 47 CFR Part 1 Subpart I, including without limitation the limits in §1.306 and §1.310; and**
- (2) within two years of the date of enactment of this Act complete such rulemaking.**

**Such rulemaking shall consider, without limitation, input from other federal agencies with relevant expertise and materials submitted at any time prior to the date of this Act in FCC Dockets 13-84, 03-137, and 19-226.**

**(b) Notwithstanding anything to the contrary in this Act, section 43101 shall have no force or effect and shall not go into effect until the FCC completes the rulemaking described in this section.**

Note: paragraph references above refer to HR 1 and should be inserted into any spectrum legislation.

**Amendment Option B)** If there is insufficient support at the moment for Option A, an alternative option (although not as good), would be to direct the FCC, prior to auctioning additional spectrum, to comply with the 2021 court remand order.

Text to be inserted in HR 1 (and any other spectrum bill):

**Notwithstanding anything to the contrary in this Act, section 43101 of this Act shall have no force or effect and shall not go into effect until the FCC complies with, and satisfies the requirements contained in, the mandate issued October 5, 2021 by the U.S. Court of Appeals D.C. Circuit in case number 20-1025. Such compliance shall consider, without limitation, input from other federal agencies**

**with relevant expertise and materials submitted at any time prior to the date of this Act in FCC Dockets 13-84, 03-137, and 19-226.**

Notes:

- Any auction authority should be contingent upon rulemaking and compliance with the court order, as set out in options A and B above, and any such bill should be so amended.
- In the absence of spectrum legislation during this Congress, we urge the Committee to include language similar to Option A in another piece of legislation, or as a standalone bill, requiring the FCC to complete a rulemaking within two years or face legislative sanction, such as limiting or curtailing its budget or activities related to spectrum auctions, and/or preparation for such options, until it completes such rulemaking. FCC's continuing work to make more spectrum available while failing to update its exposure limits puts all Americans at risk and is harming millions of Americans.

## **Rationale**

Since 2021, the FCC has ignored the US Court of Appeals DC Circuit order, issued in the successful lawsuit *Environmental Health Trust et al. v. FCC*, to provide an explanation for why the FCC decided not to update its human exposure limits for wireless radiation.<sup>2</sup> The FCC has not considered the latest science since 1996, as it is obligated to do under the law. Making more spectrum available while failing to update its exposure limits puts all Americans at risk, and is harming millions of Americans.<sup>3</sup>

Current wireless exposure standards are based largely on 11 monkeys and 12 rats, which were exposed for less than one hour, over 40 years ago.<sup>4</sup> GAO first recommended that the FCC revisit these limits back in 2012 and the FCC has not yet done so.<sup>5</sup>

The amendments above would incentivize FCC to follow the law. Complying with laws passed by Congress and a court order is not optional for the FCC – this is an administrative agency acting with impunity while 100% of its budget is paid for by the industry it is supposed to be regulating.<sup>6</sup>

Making spectrum available for commercial use will automatically trigger heavy-handed preemption of states' rights over wireless facilities, known as Section 6409.<sup>7</sup> In fact, as soon

<sup>6</sup> <https://docs.fcc.gov/public/attachments/DOC-401129A1.pdf>

<sup>7</sup> Section 6409 states:

as more spectrum is made available, carriers across the country can add almost unlimited additional antenna and additional power output on their existing facilities to emit radiofrequency radiation using the new spectrum – despite no US government agency assessing these emissions for safety.<sup>8</sup> Hundreds of localities around the country have sued the FCC over its rules implementing section 6409.<sup>9</sup>

We would be happy to discuss this letter and related matters further with you.

Sincerely,

Odette J. Wilkens
