QUOTES OF THE MONTH

Jonathan Haidt on the effects of the 'arrival of the phone-based childhood':

"I'm having wonderful debates with a few research psychologists who say that I don't have the evidence and they say, *"My focusing on this is hiding the real causes of the epidemic."* But, they won't say what those are because they don't know."

<https://groups.io/g/OneName>

Be a part of the ongoing, evolving conversation to put EMF-related illness on the map!

"A global endeavor that will kick-start a new era for the EMF-Disabled. There are millions of us now, and yet our powerful messages to the world are being diluted by a multiplicity of terminologies... We are on the precipice, knocking loudly at the door. If we want that door to swing open, we must come together as one."

"From one name flows everything." Ruth Moss

Follow CHD attorney Scott McCollough on X https://x.com/McCollough_Law

SPECIAL NOTICE

Watch on Youtube: [May 2024 Interview](#)

Author of "The Anxious Generation"

From The National Call's submission to the White House Office of Science and Technology Policy on 7-15-24:

"Abandoning the EMS Disabled to fend for themselves and leaving them between a rock and a hard place with federal agencies compelling involuntary exposure to RF radiation while also disclaiming any obligation to protect them from further injury that may be life threatening *should shock the conscience of any government official who took an oath to protect public health and welfare.* Federal agencies should not hide behind an invisible cloak of RF radiation to give them plausible deniability.

That people are not being informed of the health hazards of RF radiation, having it be forced upon them and their children without recourse, intruding into their homes, and then be discriminated against for the injuries they sustain as a result, *should shock the conscience of any government official who took an oath to protect public health and welfare.* "

A.D.A. NEW RULE UNDER TITLE II

[Justice Department to Publish Final Rule to Strengthen Web and Mobile App Access for People with Disabilities 4.8.2024](#)

[Updated 4.25.2024]

The Attorney General has signed a [final rule](#) under Title II of the Americans with Disabilities Act (ADA), which applies to State and local

for the telecom staffer - if n/a then the scheduler.

Schedule 30 min.

"I am a constituent and would like to discuss wireless bills & bridging the digital divide."

f

COORDINATE

with Odette Wilkens, Chair of the National Call, and Charles Frohman, The National Health Federation, who will present on bills with Odette Wilkens, Chair of The National Call, and Charles Frohman, The National Health Federation, who will present on bills

INVITE

other constituents, local officials, city council, mayor

CONNECT

government entities, to improve web and mobile application (app) access for people with disabilities.

The National Call responded with the following submission, making clear that:

While we applaud the DOJ's efforts "to ensure 'equality of opportunity, full participation, independent living, and economic self-sufficiency' for disabled individuals, under the ADA,1 the NPRM fails to take into consideration that the EMS Disabled, a growing population in the U.S., will not be able to use mobile applications because of the health hazards associated with use of such apps. The EMS Disabled do not need mobile apps, they need safe access to the web content, services, programs and activities on an equal basis as the general public.

See <https://thenationalcall.org/resources/> under the fold at #15 National Call Federal Submissions.

In the new rule, the Attorney General responded to our submission at webpage 285 at <https://www.ada.gov/assets/pdfs/web-rule.pdf> :

Department received comments suggesting that the rulemaking should: . . . address concerns about how the increased use of web and mobile app technologies may affect individuals with electromagnetic sensitivity. While the Department recognizes that these are important accessibility issues to people with disabilities across the country, they are outside of the scope of subpart H of this part, which focuses on web and mobile app accessibility under title II.

FEDERAL BILLS

MOVING FAST!

Need individuals in each state to contact their federal Reps/Senators, and adjoining districts.

with folks in your adjoining state districts, and neighboring states to contact their electeds

FOLLOW UP

Charles will email staffer.

Constituents should "Reply All" with thank you, include their personal experiences, local efforts opposing towers, etc.

Plan a follow up Zoom meeting a month later

GOAL

Build a relationship as a resource for staffers and electeds

BILLS THAT NEED IMMEDIATE ATTENTION:

- SUPPORT HR 8082 Will nullify the small cell order
- **OPPOSE** HR 8230 NEPA exemptions in national forests - will nullify the small cell order
- HR 1339 passed on suspension 4.26.23 Precision Agriculture Connectivity Act: Requires FCC to determine how it can use rule making to promote satellite use for precision agriculture [would require cows to swallow sensors, like a cell phone, to be radiating permanently from their stomachs].
- HR 1123 - passed on suspension 3.7.23
- Understanding Cybersecurity of Mobile Networks Act - expressly excludes the most insecure mobile network - 5G.
- HR 1353 - passed on suspension 4.25.23 Advanced Local Emergency Response Telecommunications Parity Act - requires FCC to make spectrum available to any underserved area.
- HR 682 - passed on suspension by voice vote 7.25.23 Launch Communications Act: Make spectrum available for commercial satellite launches.
- HR 1752 - passed on suspension 3.11.24 E-Bridge Act: Allows Sec of Commerce to make broadband grants available.
- HR 6492 - passed on suspension by voice vote 4.9.24 Expanding Public Lands Outdoor Recreation Experiences Act (EXPLORE Act): Omnibus federal lands bill that incorporates HR

***FAST MOVING BILLS
& GENERAL INFO***

5919 (Connect Our Parks Act) and authorizes installation of broadband in National Parks on recreational areas; allows Dept of Interior to deputize industry consultants to approve and oversee wireless installations.

- HR 4510 - passed on suspension 5.15.24 Subordinates the Pentagon to centralized authority of the NTIA and FCC by requiring them and other federal users (e.g., FAA) to first submit comments to NTIA who will filter and summarize them for FCC. For DOD, creates security risks and risks connectivity interruptions for DOD operators (launch sites, etc). Incorporates HR 1123 which excludes 5G networks from a cybersecurity study on mobile networks, the most insecure of all predecessor networks (see Sec 405(d)(2)). Former FCC Commissioner Tom Wheeler has characterized 5G as a "The CyberParadox" b/c 5G wireless is inherently insecure, so to exclude 5G makes this bill a potential waste of tax payer dollars.
- HR 1513 - passed out of Energy & Commerce Committee 5.14.24, can be voted on any day now. Creates an FCC 6G task force to create plans for 6G deployments. Should be amended to include study of health and environmental impacts?

The FCC voted on 4.25.24 on net neutrality

- [We Can Defeat Telecom's Prison!](#)
- Your elected will be hearing the issues for the first time, *so be patient, repetitive, and persistent.*
- While emailing/signing petition is good, it's insufficient.
- Follow up with phone calls, meetings, and thank

Odette's letter to the [The Epoch Times](#)

'The Harms of Electromagnetic Fields and How to Protect Yourself'

Wonderful to see the truth being covered by Epoch.

EMFs are biologically active, concluded by the Wireless Technology Research project in the 1990s (involving 200 scientists) chaired by FDA, and including EPA, OSHA, NIOSH, CDC, FCC, and NIH, the most comprehensive, interdisciplinary study in the world, to date.

Industry has known EMFs are biologically active for decades. One major telecom commissioned a scientific report which in 2000 concluded high risk of cancer and neurological disorders. A major European telecom filed for a patent in 2004 for a process to lower EMFs stating as the reason, high risk of cancer.

No pre-market testing of 5G, confirmed by US Sen. Blumenthal at a hearing of telecom execs, "We're flying blind here as far as health and safety is concerned." The WHO's Intl Agency for Research on Cancer in 2011

classified EMFs as a Class 2B possible carcinogen. Scientists from that working group and others are now calling it a probable human carcinogen. The NTP study in 2018 showed clear evidence of cancer.

The military has known EMF is biologically active for decades. Documentation proves that.

5G is a directional energy weapon now used at higher frequencies by the US military to control crowds. Also, think Havana Syndrome. To find out just how prevalent are EMF injuries and disabilities across the country, and for peer-reviewed scientific studies, visit: ehtrust.org and thenationalcall.org

Cece Doucette: Massachusetts has introduced the first civil rights bill to codify accommodations for invisible disabilities: S.1044 An Act prohibiting injurious operations or offering services or products that discriminate against or injure protected classes is sponsored by Senator Paul W. Mark and assigned to the Joint Committee on the Judiciary. S.1044 prohibits injurious operations or offering services or products that discriminate against or injure protected classes. While this bill does not specify particular protected classes, it would codify that those with electromagnetic sensitivity and all other disabilities have a right to ask for reasonable accommodations.

Neil McDougal, Steven Thomas, and Karen Churchill report...

Can We Stop the Rollout of 5G?

Steven Thomas and Karen Churchill join Richard Jobes to discuss the successes and difficulties in getting dangerous 5G technology removed.

ICNIRP public exclusion zones exist around every ground-based mast where the emissions are non-compliant. This is mentioned at par. 5 of the UK Health Security Agency document, Mobile Phone Base Stations: radio waves and health (and raised at hearing).

"With some of the larger and more powerful base stations, there can be regions around the

antennas within which the guideline regions can be exceeded. Operators identify the extent of any such regions and prevent access to them by the public."

This is further stated in the [Code of Wireless Practice](#) (paragraph 44) which states:

"Antennas (particularly 5G antennas which operate at higher frequencies) need to be elevated higher off building rooftops to ensure that exclusion zones can be maintained, particularly when the rooftop is accessible to the public (see Annex C). Where these types of considerations arise, it is vital that operators and local planning authorities discuss and agree solutions to any matters that could restrict siting options."

QUOTES

Martha G. on corporate lobbying:

"I guess it shows the importance of what we are doing - what Odette, Mark, Susie, Mary, Sidnee, and all of us here are doing - to speak up against the corporate interests that have no stake in our health and safety."

From National Call's submission to U.S. Dept of Health & Human Services 11.13.24 p.10:

"It's HHS's responsibility to uphold the standard set forth by the ADA, that the term "disabilities" includes all disabilities. If the proposed rule limits the benefits to accrue only to disabled individuals with the four enumerated disabilities: vision, hearing, cognitive, and manual dexterity,^[1] this will stratify disabled people between those with "relevant disabilities" and those who do not have them but who have just as relevant disabilities. The disparate impact of this stratification will lead to a continuous process of unacknowledged disabilities otherwise deserving of protection under the ADA."

Lionel Richie says these two elements were crucial in creating 'We Are the World'

*"We didn't have any distractions," he told CBS News.
"There was no Internet, there was no cellphones, there was nothing but purity of a thought, an idea and*

how to get it done."
