***WHAT YOU CAN DO TODAY!***

Send NHF's email to your Legislators:

[We Can Defeat](#)

- HR 1339 Precision Agriculture Connectivity Act: Requires FCC to determine how it can promote satellite use for precision agriculture [would require cows to swallow sensors, like a cell phone, to be radiating permanently from their stomachs].
- HR 1123 - expressly excludes the most insecure mobile network - 5G.
- HR 1353 - Advanced Local Emergency Response Telecommunications Parity Act - requires FCC to make spectrum available to any underserved area.
- HR 682 - Launch Communications Act: Make spectrum available for commercial satellite launches.
- HR 1752 - E-Bridge Act: Allows Sec of Commerce to make broadband grants available.
- HR 6492 - Expanding Public Lands Outdoor Recreation Experiences Act (EXPLORE Act): Omnibus federal lands bill incorporates HR 5919 (Connect Our Parks Act) and authorizes installation of broadband in National Parks on recreational areas; allows Dept of Interior to deputize industry consultants to approve and oversee wireless installations.
- HR 4510 - Subordinates the Pentagon to centralized authority of the NTIA and FCC by requiring them and other federal users (e.g., FAA) to first submit comments to NTIA who will filter and summarize them for FCC. For DOD, creates security risks and risks connectivity interruptions for DOD operators (launch sites, etc). Incorporates HR 1123 which excludes 5G networks from a cybersecurity study on mobile networks, the most insecure of all predecessor networks

Odette Wilkens,  
Chair of the National

(see Sec 405(d)(2)). Former FCC Commissioner Tom Wheeler has characterized 5G as a "The CyberParadox" b/c 5G wireless is inherently insecure, so to exclude 5G makes this bill a potential waste of tax payer dollars.

- HR 1513 - can be voted on any day now. Creates an FCC 6G task force to create plans for 6G deployments. Should be amended to include study of health and environmental impacts?
