Thank you for being a part of the ongoing, evolving conversation to put EMF-related illness on the map!

"A global endeavor that will kick-start a new era for the EMF-Disabled. There are millions of us now, and yet our powerful messages to the world are being diluted by a multiplicity of terminologies... We are on the precipice, knocking loudly at the door. If we want that door to swing open, we must come together as one."

"From one name flows everything."

- Connectivity Act: Requires FCC to determine how it can promote satellite use for precision agriculture [would require cows to swallow sensors, like a cell phone, to be radiating permanently from their stomachs].
- HR 1123 - expressly excludes the most insecure mobile network - 5G.
 - HR 1353 - Advanced Local Emergency Response Telecommunications Parity Act - requires FCC to make spectrum available to any underserved area.
 - HR 682 - Launch Communications Act: Make spectrum available for commercial satellite launches.
 - HR 1752 - E-Bridge Act: Allows Sec of Commerce to make broadband grants available.
 - HR 6492 - Expanding Public Lands Outdoor Recreation Experiences Act (EXPLORE Act): Omnibus federal lands bill incorporates HR 5919 (Connect Our Parks Act) and authorizes installation of broadband in National Parks on recreational areas; allows Dept of Interior to deputize industry consultants to approve and oversee wireless installations.
 - HR 4510 - Subordinates the Pentagon to centralized authority of the NTIA and FCC by requiring them and other federal users (e.g., FAA) to first submit comments to NTIA who will filter and summarize them for FCC. For DOD, creates security risks and risks connectivity interruptions for DOD

experiences, local efforts opposing towers, etc.
