## IN FOCUS:

### Former Insider Tells NCST How He Flipped Into The Robin Hood of Telecom

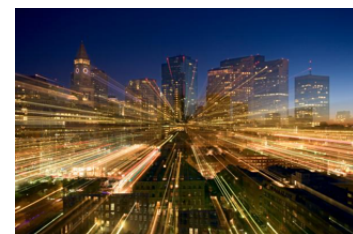

Michael Flores, of SCM Advisors, gave a presentation to members of **The National Call** explaining how he took his cell industry expertise and in 2017, a case of an antenna site on top of a dental office became a consulting business that helps landowners to fight for their rights against huge Telecoms. SCM Advisors manages approx. 600 cellular leases in the US. Flores says the Telecoms are relying on the lack of engineering expertise of cities and also misrepresenting the strength of their Wi-Fi. Most cities added 5G under telecom law 6409, which says small modifications are allowed without renegotiation and without triggering environmental review under NEPA. However, the power level of 5G is not a small modification, says Flores.

Victories

Science

Advocacy

FL A St. Petersburg cell tower victory is unifying FL realtors against cell tower installs which are reducing property values. [The tower built 25 ft. from a member of the Fl. Realtors Political Action Committee](#) incentivized Fla. realtors to partner with [Florida Coalition for Safe Technology](#) and with the [The National Call](#).

CA EMR science heavyweights say the UN's Systematic Reviews on EMF is [hopelessly flawed](#). "We uncovered numerous flaws, including the exclusion of relevant studies, inappropriate combining of studies with vastly different exposure conditions, and undisclosed biases," said Ron Melnick, of the Int'l Commission on the Biological Effects of EMFs (ICBE-EMF) who published a critique of the review in [Environmental Science](#).

MA [Massachusetts for Safe Technology](#) is following OH's lead on approaching MA legislators to write to the FCC to comply with the 2021 court remand order from the D.C. Circuit of Appeals to review the FCC's limits in light of the 11,000 pages of scientific studies showing biological effects.

“

**“You are screwing up, cities all over the United States, because you did not read under the 6409 that there is a way for the public to be protected under the 6409 [law]” said Flores. “We believe**

# that 90% of all installations made under 6409 are illegal ..."

~Michael Flores, President of SCM Advisors

## Do we need a Bill of Rights for our brains?

(AWeber ClipArt)

Sens. Chuck Schumer (D-NY), Maria Cantwell (D-WA) and Ed Markey (D-MA) want to safeguard your ideas, memories and impulses and the [Management of Individuals' Neural Data Act of 2025](#) is how they plan to do it. The bill directs the Federal Trade Commission to collaborate with officials at other federal agencies, industry leaders, consumer and patient advocates and [clinical researchers](#) to design a neural data governance structure

and fill policy gaps. Although, ex Congressman Curtis Weldon warned us about directed-energy weapons, more mundane threats exist. With companies like Neuralink looking to chip people to explore consciousness, oddly, it's the finance men and not the doctors who will guard thine neurons. The agency also would be required to investigate neural data abuses, like insurance discrimination and targeted assets.

## States block fiber to rural

Rural residents in need of safe tech internet are being denied [legal access by 16 states](#) -- like Tennessee, which allows cities like Chattanooga (also known as Gig City) to operate their own public fiber network but refuses to allow expansion beyond the city. [In 2022, Hamilton County](#), the home of Gig City allowed for Tennessee to give free safe internet

(AWeber ClipArt)

connection to the rural areas around it but [Tennessee Code Annotated § 7-52-601 et seq](#) forbids expansion. Texas, another of the 16 states, is meeting more subtle roadblocks in administrative [red tape](#).

[Read More](#)

### Landlines to be stamped out

The Federal Communications Commission and state govts. are phasing-out non-internet landlines held by 1/4 of the US pop.

Landlines are most people's emergency go-to, said [The Utility Reform Network \(TURN\)](#). Reeling from wildfires, Californians are protesting [Assembly Bill 470](#), which will eliminate AT&T's "carrier of last resort."

[TURN](#) and [The National Call](#) and other advocates submitted comments to the [FCC on its plans](#) to expedite phasing out of copper landlines in Sept. If you would like to add your voice, reply comments are due Oct. 27.

### Court: Radiation Exclusion in Insurance Coverage

In a decision handed down in July, the 7th Circuit Court of Appeals ruled that a manufacturer of electronic transformers was not entitled to insurance coverage from American Insurance Group (AIG) based on the exclusion in the

(AWeber ClipArt)

insurance policy of “any form of radiation” which the court determined to also include EMF. In [Hammond Power Solutions, Inc. v National Union Fire Insurance Company of Pittsburg, No. 24-1642 \(7th Cir. 2025\)](#) Hammond was sued by a family living near Hammond's transformer based on a cancer diagnosis.

### **[Soft Lights Foundation Settles Lawsuit](#)**

On Sept. 26, Mark Baker settled [ADA discrimination lawsuit](#) against RT Golden Hills and Gogris

Corporation for \$6,000 for failing to turn off the intense blue LED lights on an LVT video surveillance system in a shopping center. The Golden Hills felt that the flashing LED lights display would prevent crime, which seems to be a catch phrase used to install blue lights everywhere. The Soft Lights Foundation now has three chapters: [California, New York and Washington.](#)

[Read More](#)

## LOCAL GOVERNMENTS, COURTS & THE LAW

**AK** [Residents of Sitka, Alaska](#) won their fight to block a 120-foot cell tower after the Alaska Department of Administrative Hearings ruled that the project violated local ordinances. Residents received legal help from Children's Health Defense's Stop 5G initiative. The decision affirmed widespread local concerns about safety, property values and environmental risks. Tidal Network failed to show that the location would be the least intrusive means to fill the gap in service, particularly since it was located on a landslide zone. Sitkans for Safe Tech and other civically-minded residents celebrated the decision.

**AK** The city council of [Chilkat Valley](#) has voted on a "ban on new cell towers." Though the town meant to vote on a set of regulations that would have established a mandatory 1,000-foot buffer between new towers and schools, day cares, playgrounds, and youth centers, public comment absolutely changed the agenda.

**AZ** SBA Communications applied for a permit for a 120 ft. cell tower. [The permit was denied by the county in Nov. of 2024](#) following the testimony of the Environmental Illness community (EI). EI, a group of resident dealing with environmental toxins, including EMR-Syndrome, objected to the destruction of their retreat in east Snowflake city. [SBA filed their suit on Dec. 12, 2024](#) saying there are no legal grounds to deny the tower in the White Antelope Road area. (Towers may not be denied on grounds of health.) EI, with help from safe tech attorney, Andrew Campanelli, had

filed to intervene in the case. **This would be a defining case for Safe Tech advocates.** EI wants safe tech advocates to petition Navajo County to uphold their stance when they meet on Oct 14 to discuss the suit.

**CA** Safe Tech advocates are opposing a 104 ft. AT&T Macro Tower that was approved by the [San Francisco Planning and Zoning Commission in a residential area on Sept 25](#). They have submitted a memorandum with the help of safe tech attorney, Andrew Campanelli. The argument is based on aesthetics and property value and is expected to be submitted by Oct. 25. AT&T and the Sheriff's Office are arguing that the tower closes holes in a needed emergency response, FirstNet. Advocate Catherine Dodd says a study they have commissioned shows sufficient coverage without the tower.

**IL** Verizon is suing the [City of Geneva](#) over the city's permit denial of a new tower near Eagle Brook. This suit follows a similar lawsuit from 2022, which is still pending. Citizens complain the tower will lower the value of their homes and change the character of their schools.

**NC** [Greenville County](#)'s Roads, Infrastructure and Public Works Committee is considering a 180 day pause on the construction of new cell phone towers. Greenville is in high demand as location for cell phone towers. Residents said they support the county and voiced their health and property value concerns. If it gets approved, the county says this moratorium would give staff time to study and develop a strategy for towers.

**NJ** A proposal to assess the potential construction of a cell phone tower on the property of Henry Hudson Regional School in [Highlands](#) has sparked a wave of opposition among parents of students in the district. State Senator Declan O'Scanlon, R-Monmouth, CEO of wireless consulting firm FSD Enterprises, pitched the idea to the school board, stressing he was "speaking as an industry consultant, not a legislator."

**TX** The [Irving/South Haven](#) tower is going forward but residents are studying what the city of Irving can do to make installation safer, like codifying distance buffers between the tower and residential areas. The county, mimicking telecom talking points, is saying that their hands are tied by the telecom law and the city is also planning to raise the allowed height of the towers. That county needs to get in touch with CHD's Stop5G.org.

## **FEDERAL BILLS**

***Are moving quickly, threatening to take away local control!***

*Join our Federal Bills Call Thursdays 2-3 pm ET.*

## **WHAT YOU CAN DO TODAY!**

### **SCHEDULE 30 min. Zoom Meeting**

**ASAP! ✓**

[Find your legislature](#)  
or [Enter your zip code](#)

### **CALL ✓**

**CAPITAL SWITCHBOARD**  
**202-225-3121**

### **ASK ✓**

**For your Elected Official, then**  
**Ask for the Telecom Staffer**  
if n/a then the scheduler.

#### **Purpose of call:**

Your name...

"I am a constituent and would like to discuss wireless bills & bridging the digital divide."

### **COORDINATE WITH ✓**

**Odette Wilkens, Chair of the National Call and Charles Frohman, The National Health Federation**

They will present federal bills

### **INVITE ✓**

Other Constituents, Local Officials, City Council Members, Mayor

### **CONNECT WITH ✓**

Folks in your adjoining state districts, and neighboring states to contact their electeds

### **FOLLOW-UP ✓**

Charles will do an email follow up with the staffer with target points from the meeting. REPLY ALL on the same email chain with YOUR issues and/or injuries, cell towers proposed or constructed and how they adversely affect your life.

*Concise works best!*

### **THE GOAL ✓**

Build a relationship as a resource for Staffers and Electeds

---

## **SCIENCE & MEDICINE**

### **[ICBE-EMF; National Toxicology Program, National Institute of Environmental Health Sciences \(retired\), Ron Melnick Consulting:](#)**

The World Health Organization (WHO) commissioned 12 systematic reviews (SR) and meta-analyses (MA) on health effects of exposure to radiofrequency electromagnetic fields (RF-EMF). The health outcomes selected for those reviews (cancer, electromagnetic syndrome, cognitive impairment, birth outcomes, male infertility, oxidative stress, and heat-related effects) were based on a WHO-conducted international survey.

**[Institute of Health Sciences, Navi Mumbai, India:](#)** Even after adjusting for

low birth weight, it was found that higher levels of EMF radiation were associated with poorer outcomes for cognitive domains of development such as the problem-solving and personal-social areas.

[American Institute of Biological Sciences, Arlington, Virginia](#): The aims of this paper is to measure whether ferromagnetic panels sufficiently reduce the high electromagnetic fields (EMF) to which newborns are exposed in incubators and to which caregivers are exposed when working near the incubators.

[GOLIAT Project, Switzerland](#): A team of researchers from Project GOLIAT has developed and applied a new protocol to measure exposure to mobile phone radiation, in particular from 5G. The researchers measured radiofrequency electromagnetic field (RF-EMF) levels during three different scenarios: when the mobile device is in flight mode (non-user), when the mobile phone is used intensively by either downloading or uploading data. The study demonstrates that exposure to RF-EMF from mobile phone base station increases with increasing population density. However, mobile phones transmit most strongly in areas with poor network quality. [Review by Barcelona Institute for Global Health](#).

[University of Picardie Jules Verne, CURS, Amiens, France](#).

Data suggest that during prenatal development, continuous wave RF-EMF exposures at regulatory thresholds decrease cellular proliferation, alter differentiation, and decrease synaptogenesis in the immature brain of rodents. These data support the hypothesis of a vulnerability of developing organisms towards RF-EMF exposures and to maintain caution regarding RF-EMF exposures of pregnant women and young children during telecommunication use.

**Related:**

**Nicolas Hulscher, MPH, points out: [These effects were observed at 0.08 W/kg – the ICNIRP “public safety” threshold for whole-body exposure.](#) [By comparison, US cell phones are allowed to emit up to 1.6 W/kg at the head](#) (localized exposure), a level **20× higher** than what caused damage in this study.**

[The Laboratory Animal Ethical Committee of China Agricultural University](#): LED effects on the growth and development of laying hens during [pullet](#) rearing may be adversely affected due to the discomfort of the perceived illuminance. *Illuminance* refers to the amount of light that shines onto a surface, also called *lux*.

[Fatenbenefratelli Hospital, Italy](#). Electromagnetic fields from cell phones excite the brain cortex adjacent to it, with potential implications for individuals with epilepsy, or other neurological conditions. This finding is

published in Annals of Neurology, a journal by John Wiley & Sons. The article is also available online via Wiley Interscience.

**[Middle East Fertility Journal](#) [Mohammed V University in Rabat, Rabat, Morocco](#).** EMF exposure adversely affects reproductive health, particularly sperm quality and hormonal balance, with oxidative stress serving as a plausible mechanism. Public health strategies should prioritize exposure mitigation.

**[Richard Lear, Brown University. Dirty Electricity: Invisible Role in the US Health Crisis](#).** In 2019, Lear proposed that at least some of this increase in disease was due to our ever-increasing exposure to electromagnetic radiation, specifically dirty electricity. Some of the conditions he found to be affected include cancer, anxiety, depression, diabetes, multiple sclerosis, insomnia, and ADHD.

(Clipart by AWeber)

### **Lights! Action! Biological Damage!**

A National Call member reports that in getting her house checked for sources of EMR with a Stetzer meter for dirty electricity, she found that after removing her smart meter the major contributors to the EMR in her house were LED lights. After removing two bulbs the count of dirty electricity went from 800 to 30. LEDs emit electromagnetic radiation in the Visible Light portion of the spectrum. However, the only similarity between LED light and traditional light sources such as the sun, a candle, and even an incandescent light bulb is that we can detect the LED light with our eyes, skin, and nerves. Other than that, there are essentially no similarities between LED Visible Light radiation and sunlight or candlelight, or incandescent light. LED light should have remained confined to the laboratory rather than having been released into our environment, writes the [Soft Lights Foundation](#).

### **[Diabetes Monitor Sends RF Into The Body Via a needle.](#)**

Paul Harding Substack, YouTube

"This gentleman was kind enough to let me take a [video](#) of his Libre 3 Plus blood sugar monitor... In all the homes of those who wore these devices, not a single person recovered from diabetes, unlike those who didn't wear one and eliminated their exposure to supraharmonics."

---

## ADVOCACY & EDUCATION

### Living for the City, WBAI 99.5

[Wed., Sept. 10, 2025 11:00 am]

Start 5:08: [Odette Wilkens, Chair and General Counsel of the National Call, and Executive Director of the NY Alliance for Safe Technology](#)

joined Michael G. Haskins to discuss the rapid expansion of 5G, adverse health implications from wireless technologies, including impacts on the environment, overarching Federal bills that threaten to take away all local control, and the growing impact grass roots efforts and safe tech groups are having on communities in NY and across the country, advocating for safer technology.

✓ **Take Action Today!**

✓ **Schedule a meeting with your legislator**

**Coordinate with Odette Wilkens and Lobbyist Charles Frohman** who will present *key points on Fed bills* every legislator needs to know! Email Odette Wilkens: [hello@thenationalcall.org](mailto:hello@thenationalcall.org) or [action@wiredbroadband.org](mailto:action@wiredbroadband.org)

### Scarato moves to health journalism & policy group

Former director of Environmental Health Trust, Theodora Scarato addressed the National Call for Safe Technology this month. Scarato who joined the well-known Montana-based organization, [Environmental Health News](#) what EHS has to offer in information.

Founded in 2002 by scientist Pete Myers, EHS focuses on driving accurate scientific news and helping to craft proof-based science policy. Scarato will be EHS's Wireless and EMF Program Director in Washington, DC.

## Smart Meters

RF/EMF and Smart [Meter Law passes its first electoral step](#) in Massachusetts, MA and is likely to take a smart meter law directly to the voters in 2026. Next step is to gather signatures according to Patricia Burke.

(Photo by Fauxels)

## Devices

Are you still reheating your food by microwave? *Food Chemistry* found that microwaving broccoli resulted in a 97% loss of antioxidants. And what about carcinogens and impaired immunity? asks [Dr. Ernst](#).

## ACCOMODATION NEWS & HEALING RESOURCES

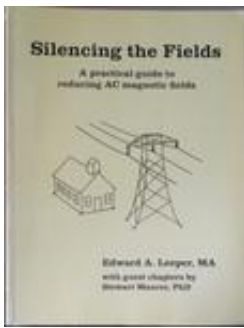

Do you need help making your home EMR safe?  
Here are some good books to read.

[Read More](#)

### How to Find a Healthy Home

Homes built after the 70's are more likely to be better wired to prevent EMR and dirty electricity, but what else should you be looking for?

## Silencing the Fields

Many people forget that it is not just the radiation but also the electromagnetic fields near your house that hurt your body.

[Read More](#)

## DIY EMF

How do you go over your house with an EMR magnifying glass? This book shows you how.

[Read More](#)

## Fighting Dirty Electricity

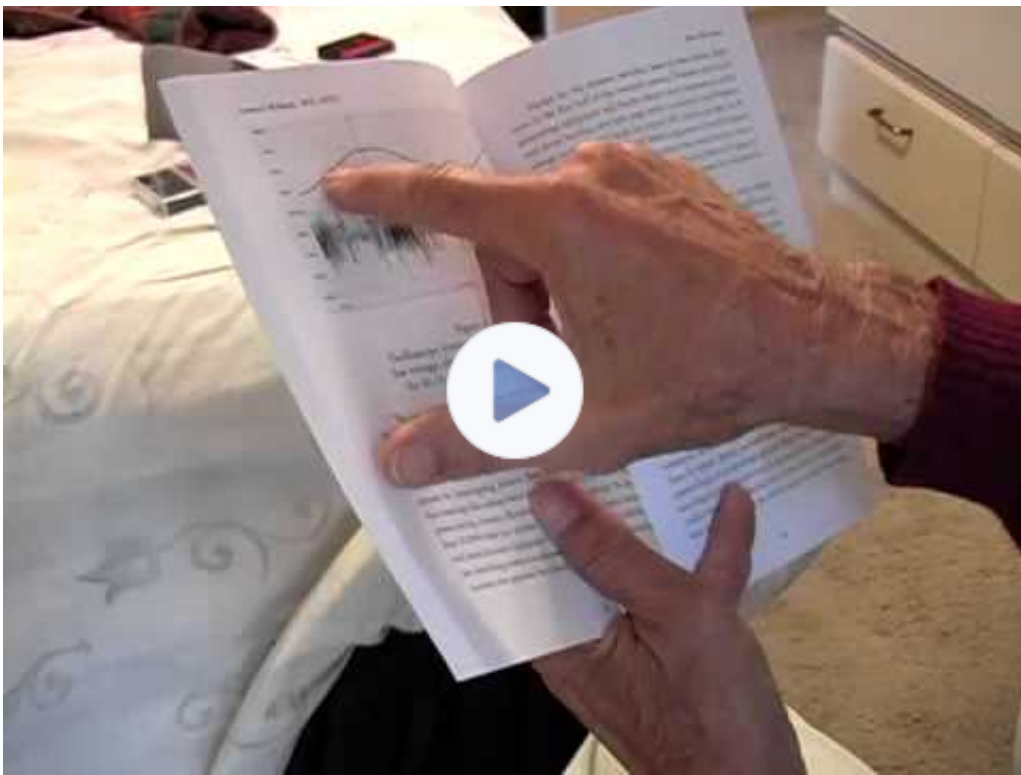

So, what exactly is dirty electricity?

"Dirty electricity, also called electrical pollution, is high-frequency voltage transients riding along the 50 or 60 Hz electricity provided by the electric utilities. It is generated by arcing, by sparking and by any device that interrupts current flow, especially switching power supplies. It has been associated with cancer, diabetes and attention deficit hyperactivity disorder in humans."

[Dirty electricity, chronic stress, neurotransmitters and disease Samuel Milham, David Stetzer](#)

[Dirty Electricity Measurement and Mitigation by Dr. Sam Milham](#)

(eon3b- The Ecological Options Network YouTube video)

When excess electricity runs through electrical wiring, it produces an electromagnetic field that is a type of EMF radiation falling under the [Extremely Low Frequency](#) (ELF) side of the spectrum.

## Spanish Environmentalist groups call out CCARS and Spanish Health Ministry on denial of EMR pollution

[Ecologistas en Accion](#), a Spanish environmentalist group has repeatedly called out CCARS and the Spanish Health Ministry on their [record of denying electromagnetic pollution.](#)

[Read More](#)

[SEROFCA](#), A well respected radiological group based in Santo Domingo reviewed new [information about cell phone radiation](#) again this past spring in one of their public talks called Conversatorios. SEROFCA had warned about cell phones since 2020.

### [Apple to lower iPhone 12 cell phone radiation levels in Europe](#)

Radiation emissions from iPhone 12 models to be reduced across all European Union countries following a [European Commission ruling](#) after France's 2023 decision to suspend phone sales due to radiation limit violations.

Will US consumers also be afforded the same protections that promise to take a bite out of Apple's iPhone 12 radiation levels?

---

### **BILLS TO WATCH!**

***FEDERAL BILLS FROM THE LAST CONGRESS...***

***ARE BEING RE-INTRODUCED THIS CONGRESS***

**S. 140** Pilot program to prevent forest fires using 5G nomadic and mesh technology, despite fire risk posed by cell towers. Has been amended.

**S. 323** Requires federal agencies to accelerate processing communications applications, including wireless; imposes "tech neutral" which usually means wireless.

**HR 339** Introduced by Rep. Crenshaw (TX) to add wireless antennas on any structure (includes buildings, schools, cell towers) without consent

**HR278** expands cell towers to “improve” service, w/o consent

**HR 279** Introduced by Rep. Griffith (VA) expands federal preemption over local government without consent by adding antennas to “improve” service

**HR 471** Introduced by Rep. Westerman (AR) Pilot program to use 5G to supposedly detect wildfires even though cell towers have caused wildfires –

**HR1455** taxpayer subsidies to wireless industry

**HR 1541** Collocation of more wireless antennas exempt from environmental review

**HR1617** Streamline or override local requests for modification of telecom infrastructure

**HR1618** “precision ag” which will harm crops, livestock and microbiome

**HR1655** Eliminate environmental review in repairing telecom infrastructure following disasters or emergency

**HR1709** cybersecurity study explicitly excludes 5G, the most insecure wireless network

**HR 1836** Accelerate deem granted applications under 6409

**HR1870** Encourages digital relining; reallocates Bead money to wireless.

**HR 2552 / S 1197**– Community BB Act introduced by Sen Mike Lee – removing barriers to bb deployment, that local leaders to protect local input – do not short circuit local input into this effort.

**HR 2750** Amends ILJA for low-income people to qualify for vouchers for wireless, but no provision for vouchers for wired service

**HR 2767** Studying glioblastoma and developing drugs for it. States that in 2024, 1 mil Americans had brain tumors. (Good to talk to them about the connection with wireless.)

**HR 2817** Excludes NEPA and NHPA environmental and historical preservation review for cell towers in a floodplain.

**S. 1568** Liberating Incandescent Technology (LIT) Act of 2025 (). Support the bill. Requested amendment to require certification of all types light bulbs for UL and low EMF.
